

# Orbit

**Mobile apps for accessing  
TASS anywhere in the galaxy.**

## Built by TASS

Built by TASS for TASS schools, Orbit leverages your existing setups and modules, integrating seamlessly with your school's ecosystem.

## Accessible on the Go

Orbit makes the Parent and Staff Portals available on the go, helping parents and staff access and update the information they need, whenever they need it.

## Customised by your School

Create a seamless experience for your school community and match your branding, so users can see your colours, logo, banner and quick links as soon as they log in.

## Targeted Notifications

Targeted push notifications mean users only get alerted to information that is relevant to them, providing a personalised experience for your school community.

## Security-Focused

Orbit supports the same secure authentication methods as TASS to ensure complex family situations are covered and no additional setup is required for parent accounts.

## Supported into the Future

Orbit has its own dedicated development roadmap, and is developed in tandem with TASS, so you're kept up to date with the latest features.

# TASS Orbit Mobile Apps

TASS Orbit is a comprehensive solution that offers a range of integrated and supported mobile apps to schools. These apps leverage the functionality of the TASS portal products, providing schools with the ability to keep their community engaged and connected.

Schools can easily provide their staff and parents with access to important information, notifications, and the ability to complete tasks on the go. This means that everyone in the school community can stay up-to-date and informed, no matter where they are. Whether it's checking schedules, viewing grades, or receiving important updates, TASS Orbit makes it easy and convenient for schools to manage their operations and keep their community connected.

# Parent Orbit

Keep your parent community informed and connected to your school through self-service tools for their convenience and your efficiency.

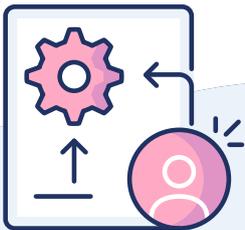

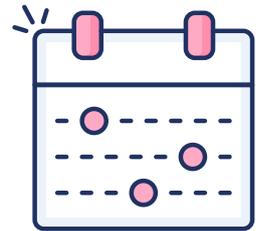

## Extra Curricular Hub

The Extra Curricular Hub provides a centralised view of sessions including training, fixtures, and events. Specific portal pages inform everyone of schedule changes, helping busy parents stay updated on cultural, sporting, musical, and academic programs.

## Calendars & Diaries

The School Calendar and Daily Notices allow parents to quickly view term dates, school events, and school notices, whilst the eDiary displays information relevant to students and integrates data from various programs in TASS, such as appointments and Parent Teacher Interviews.

## Student Maintenance

Parents can access and update student data, including vital medical and emergency information, while staying connected with administrators. The student page allows instant access to report cards, updates on curricular results, and ongoing communication with teachers.

## Notifications

Targeted push notifications ensure parents receive relevant information for their children, based on attendance, extra curricular participation, events or pastoral care entries. Parents can easily acknowledge notifications for effective communication with the school.

## Invitations & Bookings

Parents have the ability to submit future absences and receive notifications keeping them informed about their child's attendance, which they can then acknowledge and provide additional information if needed. Additionally, they can book Parent Teacher Interviews with their child's teachers, view where a teacher has requested a booking, and leave comments.

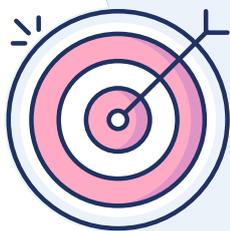

## Events & Payments

Parents can make easy payments on the go for excursions, school fees, and extra curricular activities through dedicated payment programs. Parents can also view calendar events and student-specific activities.

# Staff Orbit

Improve communication and connectivity within your staff community with the help of user-friendly tools, making their lives easier and enhancing the overall efficiency of school operations.

## Extra Curricular Hub

The Extra Curricular Hub provides staff with a consolidated look at all of their extra curricular activities, fixtures, and sessions while also including information about the students participating in the relevant activities. Staff can conveniently manage different teams and levels, and edit or cancel sessions as needed.

## Events & Diaries

Staff can stay updated on both upcoming and past events with a comprehensive view of all event details, including the list of invited and accepted attendees, as well as the options chosen by each student. Staff will also be able to access different calendar feeds, daily notices, and their personal eDiary.

## Rollcall & Timetable

Staff and substitute teachers can mark school attendance, access substitute task information, and view vital student details within Rollcall, in a summary or detailed view. Staff can also mark custom rolls for extra curricular, events and more. Teachers can access a snapshot of their daily schedule and other teachers timetables, where permitted, allowing them to monitor their whereabouts.

## Connectivity

Stay up to date and access a complete notification history, including automated alerts and messages from the Staff Portal. Empower staff to send notifications to classes, events, and extra curricular groups, and easily check notifications sent to parents and students.

## Your Students

Staff members have a powerful tool for quick access to Student Profiles, including recent searches with photos. The profiles offer vital details like Notes, Medical Info, Status, Alerts, eDiaries, and Parent Contacts. The 'Currently With' functionality allows staff to view the students they should be with while also providing them with a list of relevant alerts.

## Payroll & HR

Staff can easily submit and update leave applications on the go and approvers can review and process applications. Staff also have quick and easy access to their own information as well as the details of their colleagues, making it effortless for them to connect and communicate.

“The community has embraced Orbit and has seen the benefits of a more consolidated app offering that is native to TASS and fully integrated.

Our communications are more streamlined via notifications. We did not have the ability to target app notifications to specific students and families, and this resulted in parents often missing out on key information.

It was one of the easiest and smoothest implementations of a product we have ever had. We were provided with a clear timeline and there was very minimal work required at our end.”
